Canada health deal

ADELAIDE'S PowerHealth Solutions has partnered with Canadian Healthcare Management to bring its patient costing system to Canada.

CHM managing partner John Sexton said after extensive research it believed PHS's PowerPerformance Manager system was the best available healthcare costing application.

It would help drive "a true return on investment for hospitals and healthcare organisations in Canada", he said.

PHS managing director Patrick Power said CHM had an excellent reputation for achieving clinical and operational efficiencies in hospitals.

"This is core business for PHS and we are looking forward to working with John Sexton and his team of expert consultants to reach out to Canadian hospitals," he said.
