

# Seeley beefs up in the US

SEELEY International has bought US commercial and industrial HVAC business Integrated Comfort.

Seeley group managing director Jon Seeley said the purchase “complements and extends Seeley’s hyper-efficient commercial product range, and presents opportunity to fast-track the company’s international expansion plans in the US”.

“This acquisition is a perfect fit for both organisations, strengthening our presence in the lucrative US market and supporting our trajectory growth to become a \$1 billion company,” Mr Seeley said.

Seeley’s brands include Breezair, Coolair and Braemar.
